DETAILED ACTION

This application filed August 22, 2003, is a continuation of 09/534,487, filed March 24, 2000, which is a continuation of 09/115,920, filed July 15, 1998, now US Patent 6,146,889, which is a continuation of 08/751,546, filed November 18, 1996, now US Patent 5,789,246, which is a divisional of 08/256,696, filed July 20, 1994, now abandoned, which is a continuation of 07/741,128, filed August 7 1991, now abandoned.

Applicants' preliminary amendment filed August 22, 2003, has been received and entered. Claims 1, 2, 11, 12, and 14 have been amended. Claims 1-20 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a liver precursor cell capable of differentiating into biliary cells, classified in class 435, subclass 325.
- II. Claims 11-20, drawn to a genetically engineered hepatocyte precursor cell, classified in class 424, subclass 93.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions encompass two different products, one that has been genetically engineered. A cell

comprising a transgene ins materially different from a normal cell because it contains a heterologous gene that may affect the characteristics of the cell.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
